Profile

Backend Engineer with +3 years of experience , took the lead for the backend team several times and passion about learning about everything

Employment

Jan 2021 - present

Backend Engineer @ Poly.Codes

Worked with talented people who gave me most of the experience that I had today, I took responsibility for more than the backend tasks like client handling and project management , I designed and implemented many features in our products and apps and now we focused on creating our products.

Sep 2022 - present

Backend Team Lead @ HELPOO

I lead the backend team in the revamping process to improve performance and stability , added more features after that and carried the backend alone.
